## Mining

Our highly experienced team is empowered to deliver fast, flexible, and problem-solving solutions.

We understand that every risk is unique and endeavour to provide risk solutions that respect the actual risks presented by each individual operation.

### What makes us different?

We underwrite Property and Business Interruption risks and Construction projects of mining companies throughout the world under the International Mining Industry Underwriters (IMIU) brand.

- Our underwriters are recognised authorities in mining insurance. This, coupled with the in-depth industry experience of our engineers, enables the delivery of bespoke insurance solutions for clients.
- We are a recognised market leader in insuring operations across the full spectrum of commodities and all types of mining including underground exposures.
- Risk engineering is at the heart of everything we do – it is central to successfully underwriting this difficult and highly volatile class of business on the basis of good technical information.

- Our highly experienced risk engineers have all had long and successful careers within the mining industry, earning a global reputation for the quality of their engineering and the risk improvement measures that they are able to identify for the benefit of clients.

### Product and Service Features

- Since 1995, our team has established itself as one of the leading global insurers/reinsurers for the mining industry.
- Unusually in the insurance world, the number of engineers greatly outweighs the number of underwriters in the team. Those engineers are located across four continents and therefore geographically well placed to service the needs of our clients.
- We write Property Damage together with Business Interruption for operational mining risks, plus Construction projects.
- Our team of full-time engineers visits and assesses almost every insured mining operation on a regular basis.
- The skills and services provided by our engineering team are unmatched within the insurance industry and their risk improvement advice is highly sought after by our clients.

Established in  
**1995**

Over **250** operations insured  
worldwide

In excess of USD  
**250** Billion at risk

More than **2500**  
separate survey visits since 2003

## Who do we cover?

- Our underwriting portfolio extends globally to all types of mining, underground and surface, and for all types of commodities including gold and other precious metals, copper, and other base metals, bulk commodities such as iron ore, diamonds, and other precious stones, uranium, mineral sands, etc. Thermal coal is written within our parent company, Talanx Group, guidelines. Those can be found on the Talanx website.
- Our broad range of coverage extends to all aspects of mining activities including downstream processing. Our mining clients include some of the world's largest mining companies as well as some of its smallest.

## What happens next?

We aim to offer solutions for your full range of your insurance needs. Please contact us with any enquiry and we will assess it thoroughly, fairly, and do our very best to accommodate your requirements.
